New, Sept. 2, 1870

My Dear Edw.

A busy time, before I set off for Continent. This is list of determinations of Baker's coll. by Oliver & me.

Make a copy & send word to subscribers, & send this original to Mr. Watson at Cambridge.

The plants pay for the copy of *Griseb. Fcl. W. 2d.* which Hooker sent to Dr. Griseb.

Mr. Baker is to send you for the Kew & other sets of *Jardine's Ferns*, as soon as he collects these many of the other subscribers - very soon. If any delay, write to him. He has the business in his hands.

DeCandolle's *Trifolium* have been here & leave for Continent today. Mrs. Gray & I have been most enjoyably busy every minute. When I get time I will write to you a better letter.

Ever Yrs
Albany
